

CENTER FOR RESEARCH AND INNOVATION

Internship Opportunity:

The impetus behind Concha y Toro's newly established Center for Research and Innovation (CRI) comes about largely in response to changes and new challenges faced by our industry. CRI programs and initiatives are focused on applied research aimed at tackling real world challenges faced by our country's wine industry. The CRI is intended to serve as a meeting place for winemakers, viticulturists and researchers, with the goal of facilitating the exchange of knowledge.

*We are looking for interns for the next season 2015-2016, in **Maule Valley, Chile**, to be part of our team. Applicants must be undergraduate or graduate students of Oenology and Viticulture, Agriculture Sciences, Food Sciences or similar, intended to work in a research with us. Applicants will work in the vineyards, winery and/or laboratory.*

We are currently involved in several research lines.

Evaluation of Productive and Quality Based Parameters of Different Clonal Selections

Leaf removal strategies and cluster radiation protection effects on wine quality

Vineyard soil lixiviation

Winery instrumentation and automatization

Design of new products

*The first two projects have the opportunity to be worked as thesis in collaboration with your University. We are currently in association with several universities in Chile and abroad. So just check out if your University allows working abroad in a thesis in the industry, and apply sending a CV to: **contacto.cii@conchaytoro.cl***

Deadline: November 6 2015
